# AI STOP-ARM VIOLATION CAMERA

#710863

Powered by advanced, vision-based artificial intelligence, this IP camera facilitates violation video automatically. While the stop arm is deployed, the camera sees vehicles enter its detection zone and simultaneously triggers your camera system's DVR to flag illegal passing incidents. Crystal-clear video is automatically captured, day or night, and stored within your ARMOR™ Software Suite for easy viewing, verification and distribution.

Automated violation capture/reporting  
No panic button/driver involvement  
Promotes more focused driving
